

ARGENTINA: INVITATION TO THE INTERNATIONAL EXHIBITION OF CRAFTWORK

The Vincentian National Commission for work and housing, run by the Superior Council of the Republic of Argentina is developing a programme to promote and sell the crafts produced by families they support, and by the aboriginal people of the country. The scheme is intended to encourage integration and development through interchange, allowing poorer people to do what they do best, as well as generating a constant supply of genuine resources.

The Commission is therefore pleased to **invite** Presidents of National or Superior Councils around the world to take part, by having a stand at the first **International Exhibition** to promote and sell these crafts. This will take place in **Buenos Aires in November 2011**, date and place to be confirmed.
